Bi-Monthly publication of the Gateway Rifle and Pistol Club of Jacksonville, Florida

Jan.-Feb.

### 2008 Annual Meeting Minutes

By Bill Craig, Club secretary

November 8, 2008

1. The meeting was called to order at 10:00 AM by Fred Gatlin, Club President. A quorum was declared. Board members and officers present were Gatlin, Craig, Watkins, Erickson, Grimes, Jodi Graves, John Graves, Kerbs and Budd. Absent were Preston, Beattie and Hux.

2. Gatlin read a letter addressed to all Club members that will be sent out within the next week or so. The letter is attached as annex A of the original of these minutes. Basically, the letter stated that GRPC will be making some major changes in Club operations to improve safety due to a recent incident in which GRPC could be blamed. Craig stated that as these changes, in large part, will require some expensive construction, the Range Safety Committee will recommend at the next Board meeting that annual dues be raised about \$12 to \$15 per year as well as an increase in the rates for daily members. The last dues increase was over five years ago. Gatlin also announced that his ever increasing time commitments will not allow him to run for reelection as Club President for the year 2009.

3. The annual elections were held. Some 336 ballots were cast which is a club record.

The following people were elected to a one year office beginning on 1 January, 2009.

President Lloyd Watkins  
Vice President Sam Grimes  
Secretary Bill Craig  
Treasurer Randy Erickson  
Public Relations Officer: Arvil Budd

#### Three year Board positions for 2009-2011

Mike Hicks

Sue Carter

(note; Jodi Graves, the third 3 year member was elected to a 3 year position in 2007 for the years 2008-2010)

#### Two year Board positions for 2009-2010

Dana Baygents

Ron Peart

Braley Carroll

#### One year Board positions

Ron Barr

Gary Matthews

Russ Misner

**The following bylaw changes were approved at the meeting with over two thirds on the members present voting "yes" for approving:**

1. Para 6 (e) Under duties of the Public Relations Officer, the following sentence is deleted: "*He shall coordinate with any non club organization that wants to use the Club's facilities.*" This change now means the Club President and Business Manager will coordinate this activity with Board approval.

2. Para 12. Amendments The last sentence of the first paragraph will change:

"*A two-thirds vote of the membership present and entitled to vote will be necessary to pass or reject the proposed amendment (s).*"

The word "*reject*" will be deleted as it is poor English wording.

3. Para 12. Amendments Delete the last paragraph which reads as follows: "*The Articles of Incorporation of this corporation may be altered or amended by the affirmative vote of a majority of the Board of Directors or any special meeting of such Board call pursuant to notice or held following the waiver of notice by all members of the Board of Directors.*"

This deletion will make the Club Bylaws agree with the Articles of Incorporation. The Club Board of Directors, in the Sept, 2008, meeting voted to change the Articles of Incorporation to read that a two thirds affirmative vote of the general membership present at any regular or special meeting will be required to make a change in the Articles of Incorporation.

The meeting was adjourned at 10:45 AM.

**I am sorry to say John Cameron passed away 12/15/08. John was one of our employees and a very dear friend to all of us. He will be missed.**

**CHANGES FOR HIGH POWER RIFLE (NON 22 rimfire) SHOOTERS AT GRPC**

Recently, all 2008 Club members received a letter outlining the need for additional safety measures at GRPC.

This report will update the specific changes to date and what is coming.

1. The one hundred yard rifle ranges now have wooden partitions directly in front of the shooting benches. There are now also large sand filled bullet traps for the 25 and 50 yard target positions. The wooden partitions restrict the angle of rifle fire so that fired bullets impact the bullet traps or the 100 yard berms. Presently, both 100 yard rifle ranges have a pea gravel filled baffle at 25 yards from the firing line. A second baffle will be built in the upcoming weeks and months 22 feet from the firing lines. When the second baffles are completed, we will be able to remove part of the lower portion of the partitions to allow more height when firing from the benches. This higher partition height will be a big help to those members who use "lead sleds" for rifle support and tall spotting scopes.

Shooting will continue to be restricted to firing while seated at the benches at these two ranges

2. The 200 yard line will also have two baffles built. These baffles will also restrict the angle of rifle fire. Organized High Power rifle shooting will continue at GRPC. Individual annual/life members using this range must demonstrate the ability to shoot at and hit the 200 yard targets and berm. Range Safety Officers have the full authority to determine if a person is qualified or not qualified to use the 200 yard rifle range.

3. Our Range Safety Officer coverage is being greatly increased.

4. Our 25 and 50 yard pistol range will have eyebrows constructed at the berm similar to those at the 7 and 15 yard pistol ranges.

5. Any individual(s) found deliberately damaging the bullet traps, baffles or other Club property will face prosecution. If you see or suspect any such activity, please report it promptly to any Range Safety Officer.

6. The committee in charge of these changes is composed of the following members: Bill Craig (GRPC Secretary and committee Chairman), Sam Grimes (Vice President), Grit Preston (former Vice President), Randy Erickson (Treasurer) and GRPC Board members Braley Carroll, Dana Baygents and Ron Peart. You may contact any of the seven people for more information.

For many of you older members, these changes will make a different Club environment. Some Club members will be more affected with these changes than the vast majority of our 3,000 members. However, there is no choice. Either we make these safety changes or we will have to stop large caliber rifle shooting. An even worse scenario could be that the Club is forced to stop all shooting activity.

Bill Craig - GRPC Safety Committee Chairman

**ANNUAL CLUB AUDIT**

Our Club Bylaws require an annual audit of the Club's finances each year. The Audit is called by the incoming or newly elected President. Participants will be a Committee chairman from the Board of Directors, the incoming Treasurer and club members who volunteer. If you wish to participate, please notify me, Lloyd Watkins or leave your name and phone number with our Business Manager, Brenda Trickler. I would like several non Board members to help us with this audit. You do not have to be an accountant to participate. Common sense, an interest in the Club and curiosity are appropriate.

The audit will take place after our 2008 income tax return is finalized by our CPA accounting firm. This will be sometime between March and May of 2009.

Lloyd Watkins - GRPC President for 2009

**REMINDER**

from Bill Craig, Club Secretary

This spring, the "Muzzleblast" Club newspaper will become primarily an online newspaper which can be viewed through our website at [grpc-jax.com](http://grpc-jax.com) on the internet. If you wish to continue getting the Club newspaper at home, you must notify our Club office in writing to include your mailing address. This may be done at our Club office or by mailing to our address at 9301 Zambito Road, Jacksonville, FL 32210.

The main advantage of going on line with the newspaper is money savings to the Club to the tune of several thousand dollars. There is also a suspicion that in our busy world of limited time, many members simply discard the printed newspaper without really reading it. Anyone can access our website for general information. However, for access to the Club newspaper, Club policies or Bylaws, you will see the following notice.

**Note: Entry to the protected area requires registration and approval by the webmaster.**

**Clicking on the ENTER button above will re-direct you to a Proboards Forum where you must register using your real first and last name with no space between them (i.e. JohnDoe) and your personal password. Only then can your registration be approved.**

**Just So You Know...****Hooples versus Tactical Shooters**

by Bernard Martinage

Let's see what a *Hoople* is first. There are many names that could be mistakenly matched with *Hooples* such as *GunGeek*, *Wannabe* etc. But a *Hoople* is a special kind of people/gun, and sometime we can all be one for a while—I know I have☺.

A *Hoople* is someone who has *Hoople* equipment and gadgets. Which implies that generally the *Hoople* puts his money where his mouth is—and that is good because he/she supports the sport.

A *Hoople* has more equipment than skills, and is equipped to stand among the best—although does not have the practice to do so.

A *Hoople* often commits the error to *P.I.I.* (*Preoccupied with Inconsequential Increments*) and that leads him/her into empirical knowledge, but which value is more academic than practical.

A gun becomes a *Hoople Gun* the minute you have mounted on it—or modified it—so it requires more thinking to be used than practical experience. So it is like when *Simplicity* is overwhelmed by a blanket of *extras* and *just-in-case* stuff.

For example, I *Hoopled* my first AR15, and to this day I am still trying to sell it. I didn't damage it or anything, I just crowded it with one-in-a-million-chance-to-ever-need-it stuff. I was so eager to turn this AR into a super-rifle that I forgot to shoot it too. By the time I was done, I had a whole bunch of gadgets on it, and even some that counter each other's advantages.

I added a collapsible stock to shorten it down. But then I mounted a scope on the fixed handle so I could shoot effectively farther easier (which is not what a collapsible stock helps to do). I had a Muzzle break added, and then I put a tactical sling on it, which was a pain because as a lefty my magazine couplers got in the way. And to wrap this up I added a 37mm launcher on it with an opening large enough to shove 30,000cf smokes in it (all legal). Then of course I needed a tactical vest build to hold the extra mags and carry the smoke and fire-shower projectiles. Soooo, here I am with a 40lbs *Attack of the Aliens* type gun, with which I have shot less 100 rounds in the six years I had it. Let me know if you know someone that want to buy something in preparation for doomsday—I have just that for sale.

When I get a rifle nowadays, I buy it from *AnvilArms* because of the owner Jon Kruger. If you want to know what your AR has right and wrong? Bring it to him, and in 30 second it will make perfect sense to you.

Comments? Questions? E-mail me at [OIC@DrOpZOne360.com](mailto:OIC@DrOpZOne360.com)  
God bless.

**Security needed at the Club**

By Will Hux, Past President 1991-93

Our beloved club has become threatened by the encroachment and population of neighborhoods around us. We are also threatened by people off the street who stop by to pull out a gun and pop off a few rounds with carnival mentality. It is time to show our neighbors and the Jacksonville community that we are very serious about who we allow to handle deadly force, and how they access our facility to use it.

Often in business and our personal lives we procrastinate to fix a loose board or other unsafe things. We assume that we'll take the time and resources to "fix" something only after it creates a problem for us. Streets may not get a street light until crime reaches a certain level, or a corner will not get a needed traffic light until there has been a serious accident. We do not have to wait for a serious incident to occur at Gateway before taking action and making our club safe and responsible. We are given the gift of vision to see where potential hazards exist and correct trouble spots before they create a club-closing event.

Currently there is nothing stopping a pedestrian, vehicle or bicycle from entering our property. There is nothing in place to prevent them from leaving in the event of an incident. Witnesses or the cause of an event could simply drive right off the property.

We issue membership badges to our members and their spouses. We are disciplined to drive in one gate and out the other. Most of the ability to secure our club is already in place. Earlier this year there were a couple of estimates made to provide Barrier gates at the stop sign coming in and at the exit gate. A fence would need to be erected parallel to the entrance road and top at the sidewalk by the stop sign. This would give visitors and others a "Visitor's Parking Lot" and insure that only the vehicles of members would be allowed onto the property. Both vendors consulted had software and security cameras which could be employed and would give us a recorded view of the incoming vehicles and their occupants, their vehicle tag, and would record the visits on and off of our facility. While some people will fear "big brother" here, let's be reasonable. You can't even park at an airport or most employer's without badging- in. None of those facilities will allow weapons and ammunition like we do.

The ability to obtain the statistical data on our members' visits to the club will also help us determine a host of support and maintenance questions. If we extended that in the future to a badge-in pad at each major range, there would be a means of tracking usage which could help allocate maintenance dollars and determine the saturation point of our berms (lead build-up we only guess at now).

We need to fence our perimeter and be able to demonstrate to our new neighbors that we are serious about being a safe and secure sport shooting facility.

We can do it now, or wait until there is an incident. Why not be proactive and prevent a possible problem in the future.

**Former President urges Board to preserve the club for Members**

By Will Hux, Past President 1991-93

At over 2900 family members at Gateway we are among the largest in the Southeast USA. Our income from our club members is more than sufficient to sustain our annual operations and allow growth and safety bunkering. The founders of the club on May 5th, 1965 clearly had the membership in mind when they formed the club as a private, member organization. Their vision then, as evidenced in the original Articles of Incorporation was to serve the members of the club.

Daily shooters visited Gateway 10,000 times in 2007 and brought in just over \$127,000 in revenue. At first glance it seems like a great cash cow, but our payroll is about 150% of that figure. We keep the club store open seven days a week and 10-12 hours a day in case a daily shooter comes by and wants to spend \$11 with us.

If our average club member is a family of four, our member base is 11,600 people. If we're an average of three people, it is 8,700. Families like mine with extended kids and grandkids will skew the numbers even more. Our club has no way of knowing many of the statistics each year because we continue to have no controls for security nor a means of badging in and out as we visit.

The tens of thousands of range maintenance dollars spent and the cost of labor and materials needed annually with a maintenance staff to make repairs weighs in as well. Are we selling our club members short?

We have a 22 acre facility with about 22 ranges if you count every one. On an average weekend there are ranges very busy and some hardly occupied. The Board has never planned for 2900+ members and has no idea how to park a large surge of vehicles or manage a large influx of members coming out to shoot. They have always just assumed there are members who will pay the annual dues and come out 1-2 times a year, if at all, and not crowd the lines. When are we saturated with members? No one knows. There has been no study conducted to see the point where we can no longer service the members we have.

There is no priority for members over non-members. A non-member's decal will get them on a firing point as fast as a membership badge. When there is an absence of a working plan for controlling and serving members, there is disregard for members.

Our Board and the members do not owe the daily shooter beyond sundown on any given day they visit. We owe the annual member for making a stand and commitment to our facility and joining 2900 other members in helping to make Gateway a great club. The Board of Directors should provide a working plan to accommodate members in the years ahead.

Continued absence and low priority of a business plan to serve the members is an insult to all 2900 of us. Ask your Board what their plans are to preserve the club for us members. Ask yourself why you would allow them to sell the club's security for a lousy daily shooter's fee.
